

gBLUE Holders Club

Cross-Chain Rewards System
for Blue Protocol Ecosystem

Incentivizing gBLUE Holders with Casino Ticket Rewards
Across BSC • Abstract • Arborean DEX

Proposal Document
December 4, 2025

Executive Summary

This proposal outlines a comprehensive rewards system that incentivizes gBLUE token holders with BlueRaffle casino tickets. With gBLUE now available cross-chain on Abstract blockchain and Arborean DEX, we have a unique opportunity to create a unified ecosystem that rewards holders across all chains.

The Opportunity

The cross-chain expansion of gBLUE creates three key opportunities:

- Reward long-term holders and reduce sell pressure
- Drive liquidity to Arborean DEX through LP incentives
- Increase raffle participation and prize pools
- Create network effects across BSC, Abstract, and Arborean

Proposed Solution: gBLUE Holders Club

A tiered membership system that rewards gBLUE holders with:

- Free weekly raffle tickets based on holdings
- Purchase multipliers when buying additional tickets
- Bonus rewards for providing LP on Arborean DEX
- Cross-chain balance aggregation for tier qualification

Key Benefits

Reward Tiers	Max Free Tickets/ Week	Max Multiplier	Chains S upported
-----------------	------------------------------	-------------------	----------------------

Tier System

The gBLUE Holders Club features four tiers based on total gBLUE holdings across all supported

DIAMOND	10,000+ gBLUE	100 tickets	2.0x
GOLD	2,000+ gBLUE	30 tickets	1.5x
SILVER	500+ gBLUE	10 tickets	1.25x
BRONZE	100+ gBLUE	2 tickets	1.1x

How Tiers Work

1. Weekly snapshot captures gBLUE balances on BSC, Abstract, and Arborean DEX
2. Balances are aggregated (500 BSC + 500 Abstract = 1,000 total = Gold tier)
3. Tier benefits activate immediately after snapshot
4. Free tickets can be claimed once per week
5. Multiplier applies to all ticket purchases until next snapshot

Example Scenarios

Scenario A: Diamond Holder

Holds 12,000 gBLUE across chains !' Receives 100 free tickets/week

Buy 50 BLUE worth of tickets !' Gets 100 tickets (2x multiplier)

Total weekly tickets: 200 (worth ~212 BLUE in entries)

Scenario B: Silver Holder + LP Provider

Holds 600 gBLUE + Provides LP on Arborean !' Silver + LP Bonus

Receives 10 free tickets + 50% LP bonus = 15 tickets/week

1.25x multiplier + LP benefits create strong incentive to hold & provide liquidity

Supported Chains

Weekly process for determining rewards:

[illegible]

Technical Implementation

Smart Contract: GBlueHoldersClub.sol

```
// SPDX-License-Identifier: MIT
pragma solidity ^0.8.20;
contract GBlueHoldersClub {
    struct Tier {
        uint256 minHolding;      // Minimum gBLUE required
        uint256 weeklyTickets;   // Free tickets per week
        uint256 multiplierBps;   // Purchase multiplier (10000 = 1x)
    }
    // Tier definitions
    Tier public diamond = Tier(10000e18, 100, 20000); // 2x
    Tier public gold    = Tier(2000e18, 30, 15000);  // 1.5x
    Tier public silver  = Tier(500e18, 10, 12500);   // 1.25x
    Tier public bronze  = Tier(100e18, 2, 11000);    // 1.1x
    // Merkle root for cross-chain balance verification
    bytes32 public merkleRoot;
    mapping(address => uint256) public lastClaimWeek;
    function claimWeeklyTickets(
        uint256 totalBalance,
        uint256 lpBonus,
        bytes32[] calldata proof
    ) external {
        // Verify Merkle proof
        // Calculate tier based on totalBalance
        // Apply LP bonus
        // Credit tickets to user
    }
    function getMultiplier(address user) external view returns (uint256);
}
```

Integration with BlueRaffle

The existing BlueRaffle contract will be updated to:

- %i Query GBlueHoldersClub for user multiplier before ticket purchase
- %i Apply multiplier to tickets received (e.g., 10 BLUE × 1.5x = 15 tickets)
- %i Emit events for tracking multiplied purchases

Implementation Roadmap

Phase 1: Foundation (Week 1-2)

- Build cross-chain snapshot aggregator
- Deploy GBlueHoldersClub contract on BSC testnet
- Implement Merkle tree generation for weekly snapshots
- Create admin dashboard for snapshot management
- Internal testing with test wallets

Phase 2: Integration (Week 3)

- Update BlueRaffle contract to support multipliers
- Build ticket claim UI in frontend
- Integrate LP position detection for Arborean DEX
- Security review and testing

Phase 3: Launch (Week 4)

- **Deploy to BSC mainnet**
- **First weekly snapshot and Merkle root publication**
- **Community announcement and documentation**
- **Monitor and optimize gas costs**

Phase 4: Expansion (Future)

- **Real-time cross-chain oracle integration (LayerZero/CCIP)**
- **Native raffle entries from Abstract chain**
- **Additional LP pool incentives**
- **Governance voting for tier parameters**

Benefits Analysis

For gBLUE Holders

Passive Rewards

- Earn tickets just by holding

Ecosystem Growth

- Increased token utility

Holder Retention

+40%

Raffle Participation

+60%

- Cross-chain presence
- Multiplied winning chances
- Community loyalty
- LP bonuses stack with tiers
- Sustainable tokenomics

- Long-term holder rewards
- Exclusive Diamond benefits
- Community engagement
- Viral growth potential
- Reduced sell pressure
- More frequent rounds

For Blue Protocol

Projected Impact

DEX Liquidity

+80%

Community Growth

2x

Increased Value

- Higher participation rates

Raffle Benefits

Next Steps

Immediate Actions

- 1 Review & Approve Tier Structure**
Confirm tier thresholds, ticket allocations, and multipliers
- 2 Provide Chain Integration Details**
gBLUE contract addresses on Abstract and Arborean DEX
- 3 Confirm LP Pool Priorities**
Which pools should receive highest incentives?
- 4 Kick Off Development**
Begin Phase 1 implementation upon approval

Questions for Blue Protocol Team

- %i What are the gBLUE contract addresses on Abstract and Arborean?
- %i Are there specific LP pools you want to prioritize?
- %i Should Diamond tier have additional exclusive benefits?
- %i What is the preferred launch timeline?
- %i Any concerns about the tier thresholds or multipliers?

Ready to Build the Future of gBLUE Rewards

This proposal represents a significant opportunity to add utility to gBLUE

while driving engagement across the entire Blue Protocol ecosystem.

gBLUE Holders Club

Rewarding Loyalty Across Chains

BlueRaffle × Blue Protocol
BSC • Abstract • Arborean DEX
